

## papertube

This package comes along with a video making application.

<for AOS>

<for iOS>

### Use My Own Material

Import pdf file as a background image and create video contents with annotations.

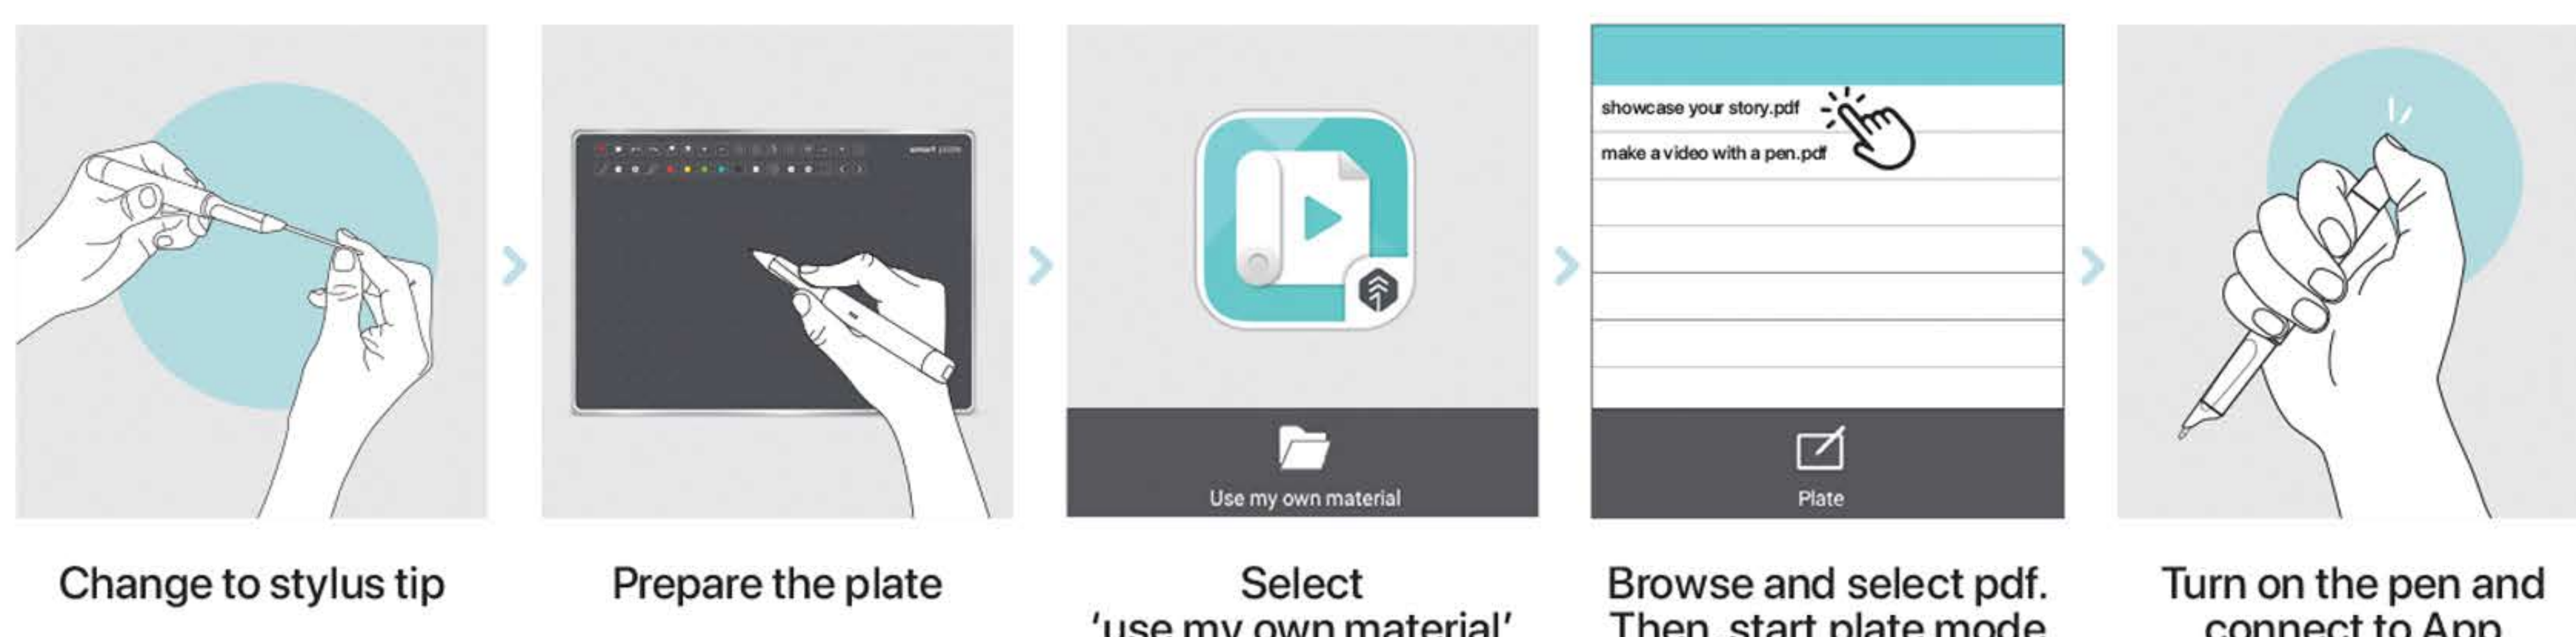

Scan the QR code on the left to see how people use PaperTube® app for online lectures and remote classes. [www.neosmartpen.com](http://www.neosmartpen.com)

Please visit official Mall to buy compatible accessories. [shop.neosmartpen.com/](http://shop.neosmartpen.com/)

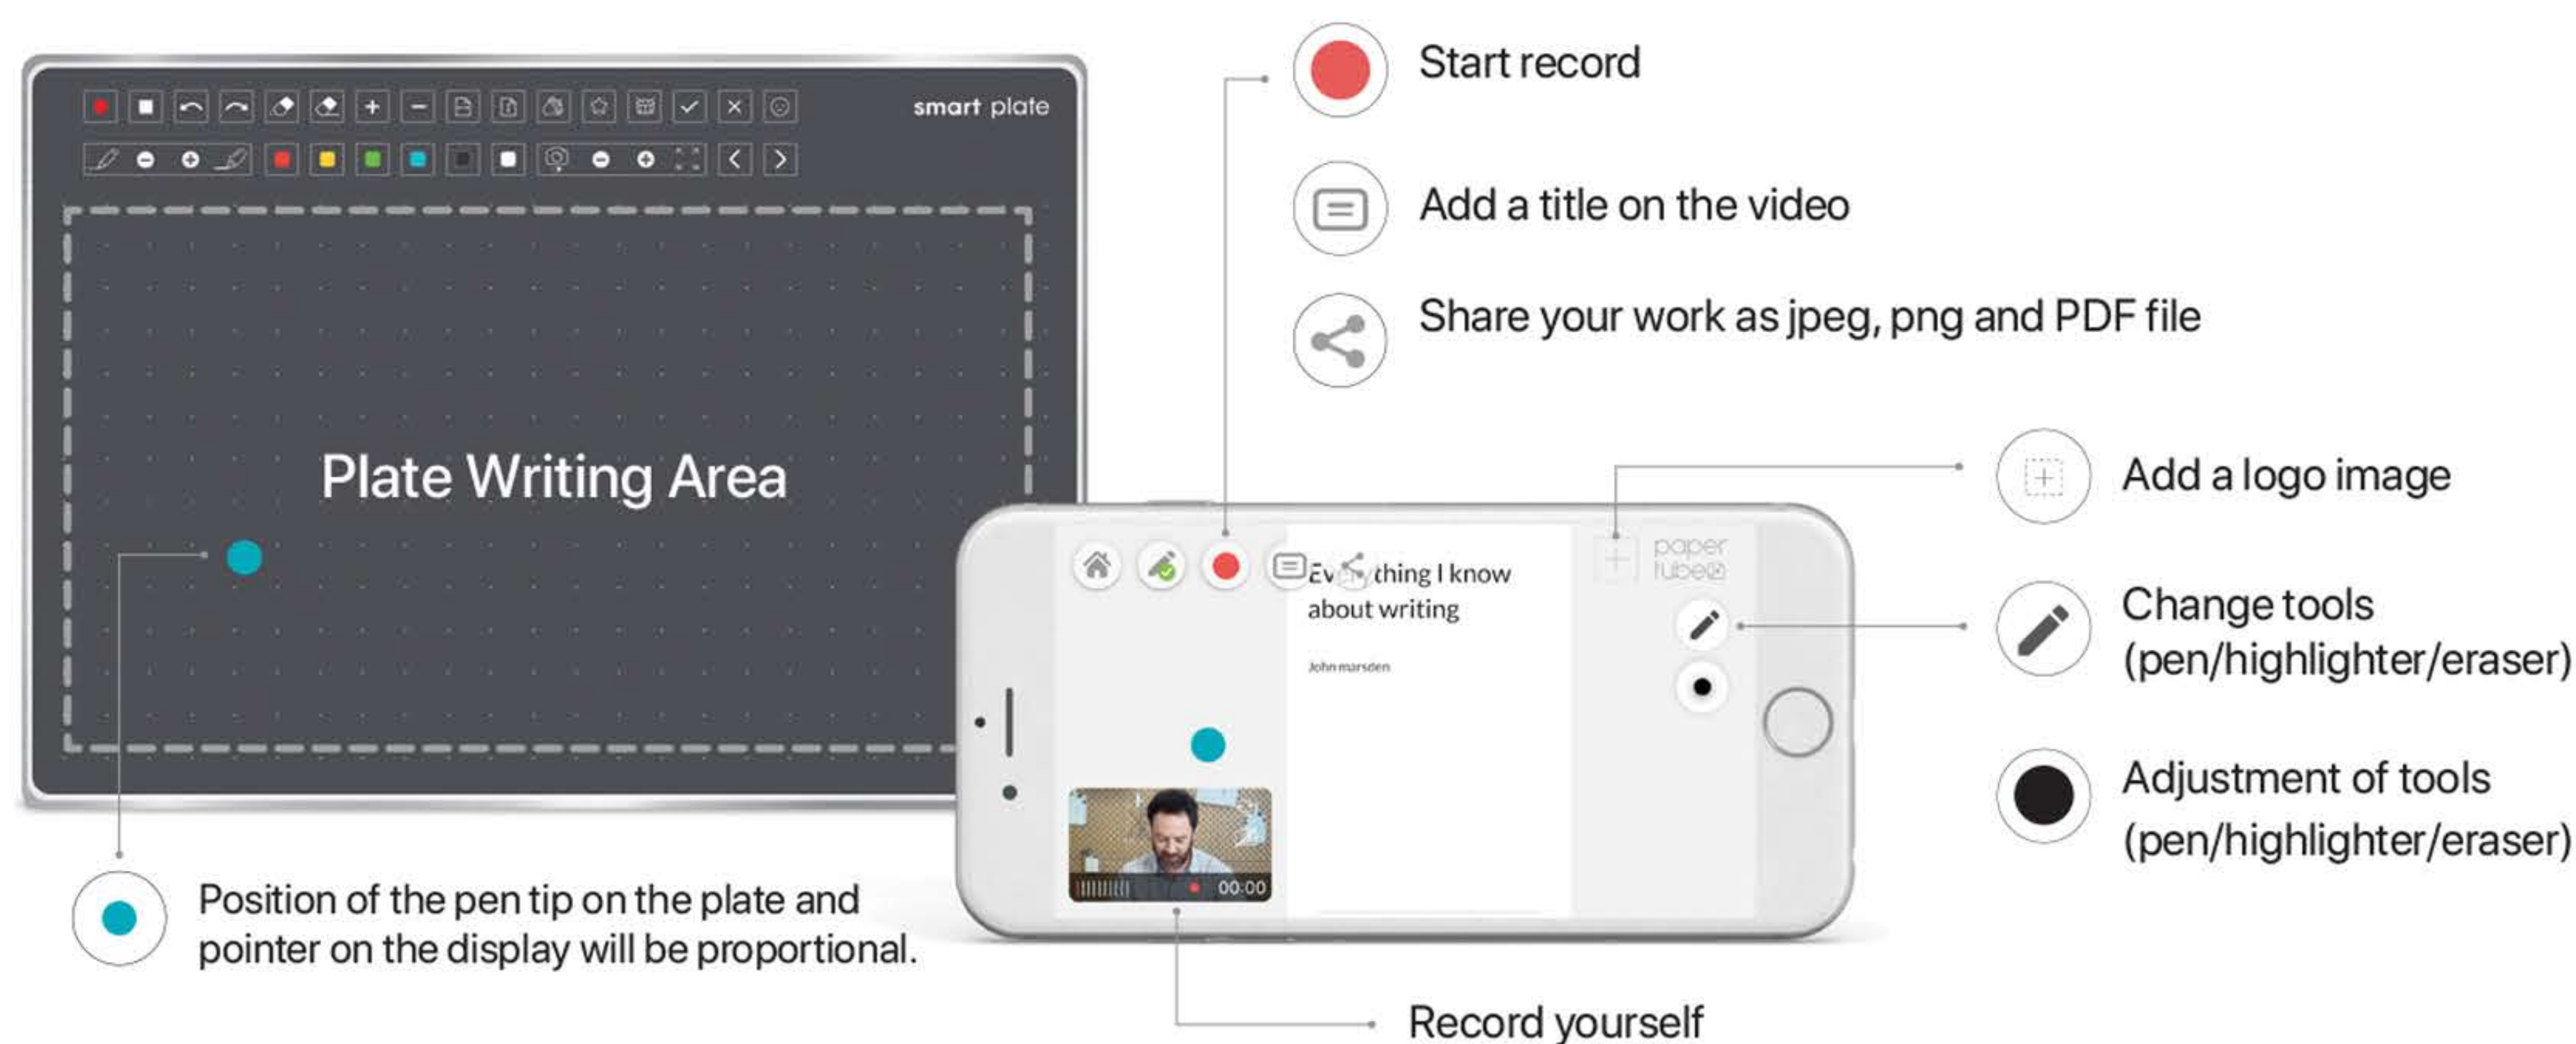

Device Storage	Minimum required storage
16 GB	1 GB
32 GB	2 GB
64 GB or above	4 GB

Please check the storage of your device before recording. We highly recommend you to record videos within 1 hour for app stability.

### Connecting the pen to App

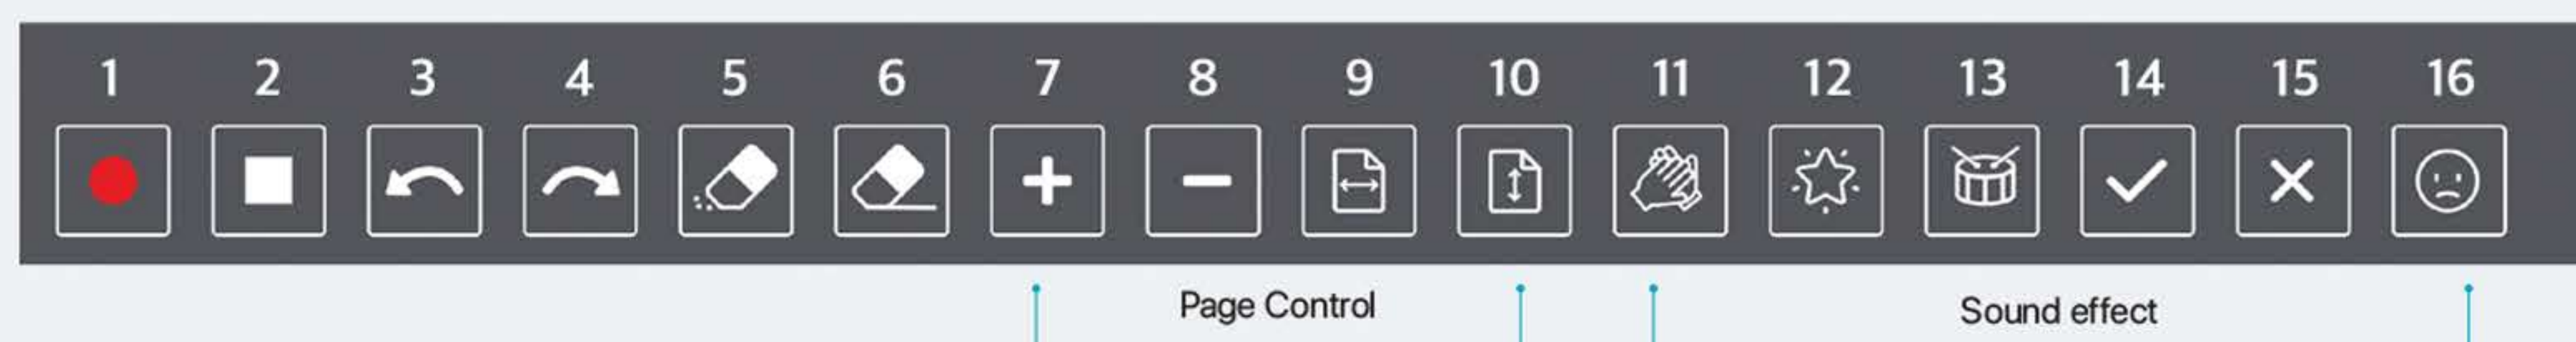

### App icon function

1. Click [Title icon], if you want to add a title in the beginning of your video.
2. Click [Logo icon], if you want to add logo of your institute.
3. Touch [Red dot] to start recording.
4. Create unique and professional contents with your handwritings.
5. Touch [Blue dot] to stop recording
6. Click [Save] to save your video work, or click [Upload] to upload it on youtube directly.
7. Click [Share icon] to share handwriting as PDF, PNG and JPG

### PaperTube® Controller Function

PaperTube controller which allows you to select various effects on PaperTube app screen just by touching with Neo smartpen, helps you to create video contents easily without navigating.

### Tips

#### For Android Device Users

Turn on flight mode to prevent any possible interruption by notification while recording.

#### For All Users

Please make sure bluetooth is turned on before connection.

### Pen Firmware Updates

Please update the firmware to the latest version. After connecting the pen to App, go to management > Firmware update.

※ Do not disconnect or turn off the power while the update is in progress.

\*For M1(F50) and N2(F121) users, please update the pen firmware to use the hover function that indicates the position of the pen on PaperTube® app.
